(EN) Authentic Italian brand with history.

Brand Lecce Pen® was founded 60 years ago in Italy and its distinguishing design still remains synonymous with Italian style and quality. Thanks innovation, we are probably one of the most recognizable international brand of promotional products. We believe that our pens fit perfectly the character and design of brands they represent. That's why we offer more opportunities than others. Each product has an added value, making it easier for you to **express your brand**.

(IT) Storico ed autentico marchio italiano.

Penne in plastica dal valore aggiunto. Lecce Pen® è stata fondata in Italia 60 anni fa e il suo design rimane sinonimo dello stile e della qualità italiana. Grazie alla continua innovazione, è probabilmente uno dei brand internazionali più riconoscibile nel panorama degli articoli promozionali da scrittura. Siamo convinti che le nostre penne possono integrarsi perfettamente con i brand che rappresentano. È per questo che cerchiamo di offrire più soluzioni rispetto agli altri. Ogni nostro prodotto ha un valore aggiunto che supporta **la comunicazione del vostro marchio**.

(FR) Véritable et historique marque italienne.

Lecce Pen® est née en Italie il y a 60 années et son design reste synonyme du style et de la qualité italienne. Grâce à sa innovation continue, nous sommes parmi les marques internationales les mieux connues dans le scénario des articles promotionnels pour l'écriture. Nous sommes convaincus que nos stylos peuvent s'intégrer parfaitement avec les marques qui représentent. C'est pour cette raison que nous sommes à la recherche de plus des solutions par rapport aux autres. Tous nos produits ont une valeur ajoutée qui soutiens **la communication de votre marque**.

(ES) Marca italiana auténtica con historia.

Marca Lecce Pen® fue fundada hace 60 años en Italia y su diseño distintivo sigue siendo sinónimo de estilo y calidad italiana. Gracias a la innovación, somos probablemente una de las marcas internacionales más reconocible de productos promocionales. Creemos que los nuestros bolígrafos puedan encajar perfectamente en el carácter y el diseño de las marcas que representan. Es por eso que tratamos de ofrecer más soluciones que otros. Cada producto tiene un valor que es compatible con **la comunicación de su marca**.

(RU) Истинный итальянский бренд с историей.

Бренд Lecce Pen® был основан в Италии более 60 лет назад. Его характерный дизайн до сих пор остается синонимом итальянского стиля и качества. Благодаря инновациям мы являемся производителем, пожалуй, самого узнаваемого международного бренда промо-продукции. Мы убеждены, что наши ручки могут идеально соответствовать характеру и дизайну брендов, которые они представляют. Именно поэтому мы стараемся предложить больше решений, чем другие. Каждый продукт имеет свои особенности, благодаря чему вам легко найти ту ручку, которая наилучшим образом **выразит ваш бренд**.

FROM 1990 THE ECOLOGY

BIODEGRADABLE

The **biodegradable** material solves problem of items arrived to the end of its cycle of the life, and **does not generate waste.**

(EN) The biodegradable material solves problem of items arrived to the end of its cycle of the life, and does not generate waste.

(IT) Le materie plastiche biodegradabili risolvono il problema degli articoli a fine ciclo di utilizzo perché non generano nuovi rifiuti.

(FR) La matière biodegradable va résoudre le problème des articles qui sont arrivés à la fin de leur cycle vital, et on ne va pas originer des déchets.

(ES) El material biodegradable resuelve el problema de las mercancías llegadas al final de su ciclo de la vida, y no genera residuos.

(RU) Биоразлагаемый материал решает проблему утилизации органических отходов.

IS OUR PHILOSOPHY!

RECYCLED

The **recycled** material help to **convert waste materials** into reusable material to prevent waste of potentially useful materials.

(EN) The recycled material helps to convert waste materials into reusable material to prevent waste of potentially useful materials.

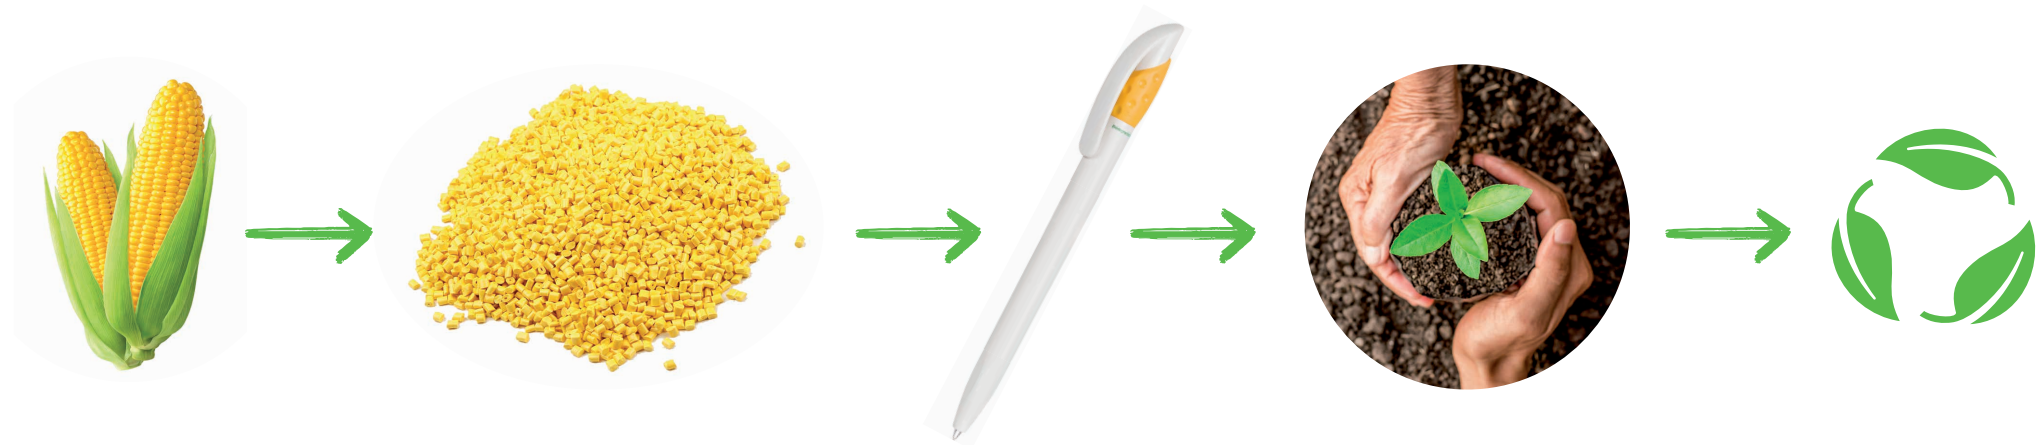

(IT) Le materie plastiche riciclate aiutano a convertire i rifiuti in nuovi prodotti potenzialmente utili.

(FR) La matière recyclé aide à transformer les déchets en matériaux réutilisables pour prévenir la diffusion de matériaux potentiellement inutiles.

(ES) El material reciclado ayuda a convertir los materiales de desecho en materiales reutilizables para evitar el desperdicio de materiales útiles.

(RU) Перерабатываемые материалы можно использовать многократно, оберегая невозобновляемые природные ресурсы.

BIODEGRADABLE

EN Our „green” pens are produced with a new bioplastic of natural origin: born from renewable resources of agricultural origin (non genetically modified corn starch) and return to the earth through biodegradation and/or composting processes without releasing polluting substances (also the dyes used are biodegradable).

The pens produced with this new bioplastic (except refill and spring) are 100% biodegradable responding to the demand for consumer products with low environmental impact.

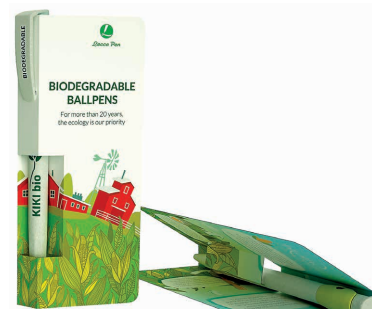

IT Le nostre penne „green” sono prodotte con una nuova bioplastica di origine naturale: nascono da risorse rinnovabili di origine agricola (amido di mais non geneticamente modificato) e tornano alla terra attraverso processi di biodegradazione e/o compostaggio senza rilascio di sostanze inquinanti (anche i coloranti usati sono infatti a base biodegradabile). Le penne prodotte con questo nuova bioplastica sono biodegradabili al 100% (eccetto refill e molla) rispondendo alla domanda di prodotti di largo consumo a basso impatto ambientale.

FR Nos stylos „green” sont fabriqués avec une nouvelle bioplastique d’origine naturel: ils arrivent de ressources renouvelables d’origine agricole (Amidon de mais, pas modifié génétiquement) et retournent dans le terrain parmi des procès de biodégradation et de compostage sans relacher des substances polluantes (Les couleurs aussi sont réalisées avec une base biodégradable) Les stylos réalisés avec cette nouvelle bioplastique sont biodégradables au 100% (hormis cartouche et ressort) en répondant à la demande de produits de grande consommation et avec un petit impacte environnemental.

ES Nuestros bolígrafos „green” se producen con un nuevo bioplástico de origen natural: nacen de recursos renovables de origen agrícola (almidón de maíz no modificado genéticamente) y vuelven a la tierra a través de procesos de biodegradación y / o compostaje sin liberar sustancias contaminantes (también los colorantes utilizados son biodegradables). Los bolígrafos producidos con este nuevo bioplástico son 100% biodegradables (excepto el muelle y la carga) respondiendo a la demanda de productos de consumo con bajo impacto ambiental.

RU Наши ручки „Green” изготавливаются из материалов природного происхождения – нового биопластика, созданного на основе возобновляемых ресурсов сельскохозяйственного происхождения (генетически не модифицированный кукурузный крахмал) и по окончании жизненного цикла продукта возвращаются в землю в процессе биоразложения и/или компостирования без выделения загрязняющих веществ (используемые красители также являются биоразлагаемыми) Ручки „Green”, изготовленные из этого нового биопластика, на 100% биоразлагаются (за исключением стержня и пружины), что соответствует современным требованиям к товарам с минимальным влиянием на окружающую среду.

R-PET

NEW!

PET recycled

EN „R-PET line” is a line of writing articles made with recycled PET coming from the collection of industrial waste and post consumer products like water and soft drink bottles, food boxes,...

Once the differentiated collection is carried out and the material is transported to special sorting centers, this is shredded and regenerated in the form of flakes and granules.

Thanks to its characteristics, PET can then be reused to create new products.

The recycled PET thus becomes R-PET.

IT „R-PET line” è una linea di articoli da scrittura realizzati con il PET riciclato proveniente dagli scarti industriali e post-consumo di articoli in PET quali: bottiglie d'acqua e/o bevande, contenitori, film, etc..

Una volta effettuata la raccolta differenziata e trasportato il materiale in appositi centri di smistamento, questo viene triturato e rigenerato in forma di scaglie e granuli.

Grazie alle sue caratteristiche, il PET può essere poi riutilizzato per dar vita a nuovi prodotti.

Il PET riciclato diventa così R-PET.

FR „R-PET line est” une ligne d'articles pour l'écriture réalisé en PET recyclé qui arrive des déchets industriels et objets usagés en PET comme bouteilles d'eau et ou boissons, boîtes, pellicules, etc..

Une fois effectué le tri et transporté le matériel dans les centres de recyclage, cela va être trituré et régénéré sous forme d'écaillés et grains.

Grâce à ses spécifications, le PET peut être ensuite réutilisé pour donner origine à des nouveaux produits.

Le PET recyclé devient donc R-PET

ES La línea „R-PET” es una línea de artículos de escritura hechos con PET reciclado a partir de desechos industriales y postconsumo de artículos de PET, tales como: botellas de agua y/o bebidas, envases, películas, etc.

Una vez que se ha llevado a cabo la recolección por separado y el material se transporta a centros de clasificación especiales, este se tritura y regenera en forma de escamas y gránulos. Gracias a sus características, el PET puede reutilizarse para crear nuevos productos. El PET reciclado se convierte así en R-PET.

RU „R-PET” - это линия пишущих принадлежностей из переработанного "recycled PET" материала на основе сырья из бутылок для воды и других напитков.

После проведения раздельного сбора отходов и транспортировки этого материала в специальные сортировочные центры, его измельчают и регенерируют в виде хлопьев и гранул. Благодаря своим характеристикам, PET может быть повторно использован для создания новых продуктов, потому что в процессе обработки он не теряет свои основные свойства. Таким образом, переработанный PET становится R-PET.

 **rPET Line**

BEVERAGE CARTON RECYCLED

(EN) EcoLine is a line of writing instruments made in a special material coming from the recycling of beverage cartons. Beverage cartons are in fact composed of several layers: cellulose, polyethylene and aluminum. After a first processing for the recovery of cellulose, the fraction of polyethylene and aluminum is further processed to generate a new second raw material. This recycled material has a very particular aesthetic aspect (thanks to the presence of aluminum together with the plastic component) which distinguishes it from any other on the market.

(IT) EcoLine è una linea di articoli da scrittura realizzati con uno speciale materiale proveniente dal riciclo dei cartoni per bevande. I contenitori per bevande sono infatti composti da diversi strati: cellulosa, polietilene ed alluminio. Dopo una prima lavorazione per il recupero della cellulosa, la frazione di polietilene ed alluminio viene ulteriormente lavorata per generare una nuova materia prima seconda. Questo materiale riciclato si presenta con un aspetto estetico del tutto particolare (grazie alla presenza dell'alluminio unitamente alla componente della plastica) che lo contraddistingue da ogni altro sul mercato.

(FR) EcoLine est une gamme d'articles pour réalisés avec une matière spécial dérivé du recyclage des cartons alimentaires. Les conteniteurs pour boissons sont composés parmi différents couches: cellulose, polyéthylène et aluminium. Suite un premier traitement pour récupérer la cellulose, la partie de polyéthylène et aluminium sera encore traitée pour obtenir une nouvelle matière première. Cette matière recyclée se présente avec un aspect particulier (grâce à l'aluminium uni au composant plastique) qui est le trait distinctif parmi les autres matières sur le marché.

(ES) EcoLine es una línea de artículos de escritura hechos con un material especial proveniente del reciclaje de cartones de bebidas. Los envases de bebidas están compuestos de celulosa, polietileno y aluminio. Después de un primer procesamiento para la recuperación de celulosa, la fracción de polietileno y aluminio se procesa para generar una nueva segunda materia prima. Este material reciclado tiene un aspecto estético muy particular (gracias a la presencia de aluminio junto con el componente plástico) que lo distingue de cualquier otro en el mercado.

(RU) EcoLine – это линия пишущих принадлежностей, изготовленных из специального материала на основе переработанной упаковки для напитков. Пакеты для напитков состоят из нескольких слоев: целлюлозы, полиэтилена и алюминия. После извлечения целлюлозы фракция полиэтилена и алюминия в дальнейшем перерабатывается в новое вторичное сырье. Этот переработанный материал отличается от любого другого на рынке благодаря наличию алюминиевого компонента в пластике. Вторичное использование материалов поддерживает систему сбора и утилизации отходов, и резко уменьшает нагрузку на окружающую среду.

Services

SILKSCREEN 360°

EN **Rounded Overprinting 360°**
The technique of screen printing that allows to print almost the full circumference of the pen, it increases the field of advertising presentation.

IT **Stampa Circolare 360°**
E' la stampa su superfici rotonde: permette di aumentare l'area di stampa rispetto quella tradizionale in linea grazie alla possibilità di utilizzare tutta la circonferenza della penna.

FR **Impression Permanent 360°**
La technique de la sérigraphie permet une impression sur des surfaces arrondies. Cela augmente la présentation du champ de la publicité sur l'objet, grâce à la possibilité d'imprimer le périmètre complet du stylo.

ES **Impresión Redonda 360°**
La serigrafía permite la impresión de superficies curvas. Ello aumenta el campo de presentación de publicidad sobre el objeto, gracias a la posibilidad de imprimir el perímetro completo del bolígrafo.

RU **Круговая печать 360°**
Технология трафаретной печати, позволяющая нанести рекламное изображение практически на всю окружность ручки, что увеличивает площадь рекламного сообщения. Идеально для векторных изображений.

DIGITAL PRINTING 360°

EN **Digital Overprinting 360°**
360° to satisfy your creativity. Digital foil allows you to print photos on the whole barrel.

IT **Stampa Digital 360°**
La stampa a 360 è perfetta per la vostra creatività: permette di ricreare immagini fotografiche su tutta la circonferenza della penna.

FR **Impression Numérique 360°**
360° pour ta créativité. La feuille numérique permet de recréer les photos sur toute la surface du corps.

ES **Impresión Digital 360°**
360° para tu creatividad. La película digital permite recrear fotos en toda la superficie del producto.

RU **Цифровая Печать 360°**
Идеально подходит для вашего творчества. Стойкая пленка с цифровым фото или растровым изображением покрывает всю поверхность корпуса ручки.

DIGITAL PRINTING

EN **Digital Overprint**
Full-color flat digital print that allows to present gradation of colors and accurate details of the logo.

IT **Stampa Digital**
Stampa digitale in quadricromia per superfici piane. Adatta a loghi molto definiti.

FR **Impression Numérique**
Impression numérique multicolore et plate. Elle permet de former les dégradations coloristiques.

ES **Impresión Digital**
Impresión digital a todo color en superficies planas. Permite la transición entre tonalidades.

RU **Цифровая Печать**
Полноцветная прямая цифровая печать позволяет нанести все мелкие детали логотипа и тонкие градации цветов на плоские поверхности.

PAD PRINTING

EN **Pad Printing**
The technique of printing on small, not necessarily flat, surfaces. Appropriate for labeling different kinds of plastic and metal.

IT **Tampografia**
Processo di stampa per piccole superfici, spesso irregolari. Può essere utilizzata per la stampa su diversi tipi di materiali (plastica, metallo).

FR **Tampographie**
C'est une technique d'impression adaptée aux petites surfaces, pas nécessairement plates. Elle convient à toutes sortes de matières plastiques, de métal ou de bois.

ES **Tampografía**
Tecnología de impresión en superficies pequeñas, no necesariamente planas. Es apto para todo tipo de materiales artificiales, metal o madera.

RU **Тампопечать**
Техника печати на небольших, необязательно плоских, поверхностях. Подходит для нанесения на пластиковые и металлические ручки.
